10+ PROJECTS IN 2026

5 IN PRODUCTION

PROFESSIONAL PROFILE

I'm **Federico Lora**, a Higher Technician in Network Systems Administration (ASIR), and I work as a **full-stack developer and project manager at CleverByte Consulting** in Córdoba. I handle several projects at once, such as **Cleo AI**, which I built entirely myself, and **Turyos**, which I now manage. In the afternoons I'm finishing my **Higher Degree in Multiplatform Application Development (DAM)**.

I build **cross-platform apps**, mainly with **Flutter**, for Android, web and Windows from a single codebase, and I **set up the servers they run on**, with Linux, Docker, PostgreSQL and Cloudflare, with no open ports and with backups. My strong point is the **frontend**, although I'm full stack and take care of everything.

Since February 2026 I've been taking my own and client projects to production. I've already delivered the **Guadalupe App** for the 2026 pilgrimage, and I'm still working on the app for the **World Organism of Cursillos in Christianity**, the website of the **Génesis Socio-Cultural Association** and **Faiten**, my biggest personal project.

I come from the systems world. I've worked with servers, networks, hardware and cybersecurity at Hospital Cruz Roja, at Magtel and on an Erasmus+ placement in Lithuania, and it shows in how I work, **documented, tested and secure from day one**.

The phrase that defines me best is *“Excellence is not an act, but a habit”*.

PROFESSIONAL EXPERIENCE

Full-Stack Developer and Project Manager
Feb 2026 – present

CleverByte Consulting, Córdoba

- Project manager of Turyos, working on several projects at once.
- AI assistants connected to the Dolibarr ERP (MCP) and to WhatsApp, including Cleo AI, which I built entirely myself.
- Private AI platform with local models (Ollama), LiteLLM, OpenWebUI and daily backups.
- Dolibarr ERP on Docker with PostgreSQL, and production database administration.
- Sign-up and free-trial forms for CleverFactu, and WordPress server migrations.

App, Web and Server Development
2026 – present

Independent projects · for clients and my own

- Guadalupe 2026, the pilgrimage app, on mobile and on the web (Flutter, API and admin panel).
- OMCC, the Cursillos in Christianity app and its server, in development.
- Génesis, the association's website on its own WordPress and the move of its blog.
- Faiten, my personal intelligence app, from idea to production.

IT Technician, ASIR Internship
2025

Hospital Cruz Roja, Córdoba

- Operating system installation and configuration.
- Incident resolution in a critical hospital environment.
- Computer hardware repair and maintenance.
- Technical support and software configuration.

IT Technician, SMR Internship
2023

Magtel, Córdoba

- Incident resolution and end-user technical support.
- System administration and maintenance.
- Computer assembly and hardware repair.
- Training in process modelling with Bizagi Modeler Studio.

INTERNATIONAL EXPERIENCE

IT Technician, Erasmus+ Internship

Jun – Jul 2022

Emtoservis, Vilnius (Lithuania) 🇱🇹

- Took part in the European Erasmus+ programme as an IT technician in a multicultural environment.
- Strengthened my technical skills, my adaptability and my technical and professional English.

EDUCATION

Multiplatform Application Development (DAM) *(In progress)*

CES Lope de Vega, Córdoba

Higher Degree · 2025 – 2027

Network Systems Administration (ASIR)

CES Lope de Vega, Córdoba

Higher Degree · 2023 – 2025

Microcomputer Systems and Networks (SMR)

CES Lope de Vega, Córdoba

Intermediate Degree · 2021 – 2023

Secondary Education (ESO)

Colegio Bética Mudarra

2016 – 2021

AWARDS AND ACHIEVEMENTS

Andalucía Skills 2025 Finalist

IT Network Systems Administration (Jaén)

Andalusia Champion, FLL 2017

First Lego League

Spain Finalist, FLL 2017

First Lego League National

Erasmus+ Grant 2022

Work placement in Lithuania

Introduction to Microsoft Azure

Cloud fundamentals

Bizagi Modeler Certification

BPM process modelling

Robotics

4 years of studies at Bwit

Arduino

2 years of programming at Bwit
